

WELCOME!

On behalf of Splash! Publications, we would like to welcome you to *Indiana History*, one of several books in our State History series. Since this curriculum was designed by teachers, we are positive you will find it to be a very comprehensive program for teaching students about Indiana's history. We would like to take a few moments to familiarize you with the program.

THE FORMAT

Indiana History is a 10 lesson program. Our goal is to provide a curriculum that you can use the very first day you purchase our materials. There are no lessons to plan, comprehension questions to write, activities to create, or vocabulary words to define. Simply open the book and start teaching.

Each of the 10 lessons requires students to complete vocabulary cards, read about an event in Indiana's history, and complete Reading exercises that will strengthen their comprehension of expository and informational text. In addition, each lesson includes a balanced mix of lower and higher level activities for students to complete. Vocabulary quizzes, mapping activities utilizing grid systems and number coordinates, primary and secondary source research activities, graphic organizers for letter, story, and paragraph writing, time lines, and following written directions are the types of activities that will guide students on their journey through *Indiana History*.

THE LESSON PLANS

On the next several pages, you will find the Lesson Plans for *Indiana History*. The Lesson Plans clearly outline what students must do before, during, and after each lesson. Page numbers are listed so that you will immediately know what you need to photocopy before beginning each lesson. The answers to all activities, quizzes, and comprehension questions can be found on pages 102-111.

THE VOCABULARY

Each lesson features words in bold type. We have included a Glossary on pages 98-101 to help students pronounce and define the words. Unlike a dictionary, the definitions in the Glossary are concise and written in context. Remember, we're teachers! Students will be exposed to these vocabulary words in the comprehension activities. They will also be tested on the vocabulary words four times throughout their study of *Indiana History*.

Students will be responsible for filling out and studying the vocabulary cards. You may want to have students bring in a small box for storing their vocabulary cards. We don't have to tell you that incorporating these words into your Reading and Spelling programs will save time and make the words more meaningful for students.

INDIANA’S ACADEMIC STANDARDS

Indiana History was designed in alignment with Indiana’s Academic Standards for Social Studies and Language Arts. These standards serve as a framework for Indiana’s curricula by providing student performance expectations in these areas. The Lesson Plans on the following pages clearly list the Social Studies and Language Arts standards and how they correlate with each lesson and activity in *Indiana History*.

CORE STANDARDS: THE “BIG IDEAS”

Core Standards help teachers prioritize instruction and connect the “big ideas” students need to know in order to advance. Indiana is one of several states incorporating the Common Core Standards into its Academic Standards. As a reading-based program, *Indiana History* fosters literacy in History and Social Studies.

At the same time that students are learning important factual content about Indiana’s history, they are meeting the Common Core Standards by constructing time lines for themselves and Indiana’s famous explorers, writing imaginative stories and letters about their adventures as fur traders and their participation in the French and Indian War, persuading Napoleon Bonaparte not to sell Louisiana to the United States, asking and answering their own questions about the Revolutionary War, and writing their own classroom rules to make connections to the “big ideas” in the history of Indiana. Common Core Standards found in *Indiana History* have also been noted in the Lesson Plans.
