

Teacher Created. Teacher Owned.

Looking for RTI-based curriculum? We can Help!

Tier One: Majority of Students

Our high quality units are effective for 80-85% of students. A balanced mix of lower and higher level activities makes it easy for different types of learners to experience success.

Tier Two: 10-15% of Students

Academically or behaviorally at-risk students who need intervention from teachers and other adults will find success with our spiraling curriculum built around a repetitive format. Step-by-step lesson plans found in each of our units makes it easy for support staff and volunteers to adapt our ready to use activities in small or cooperative groups and centers.

Tier Three: 5% of Students

Our high interest lessons and hands-on activities ensure success for students needing specific individual support. Each of our eight US Region units has been recorded on audio cds. Students receiving special services outside the classroom won't miss one minute of their favorite subject.
